

# **GUIDE TO EUROPEAN VASES AUGUST 2014**

**by  
John Nielsen  
and  
Loretta Nielsen**

## A Guide to this Article

We have attempted to list and picture all the iridized carnival glass European (including England) vases known to date. Many of the pictures are of vases in our collection; others were taken at carnival glass auctions, conventions, or received from sellers (mostly in Europe).

Since we do not violate copyrights, where we do not have a picture we refer you to the Thistlewood books, coded as follows:

*Century* = A Century of Carnival Glass      *Art* = The Art of Carnival Glass

*Magic* = Carnival Glass, The Magic and The Mystery (Issue 2)

Some vases are pictured only in the CDs issued by the Thistlewoods for Finland and Sweden, these will be noted in the vase descriptions.

(Makers original names are shown in parenthesis after the common names).

We will update this brochure as new vases are discovered or moved.

Note that the "Unknown Maker:" has been changed to "Rosice U Brna" Many of our readers may have heard about the catalogue with no cover discovered in Czechoslovakia. The Thistlewoods have published an article in the May 2013 CGS UK newsletter describing their search for the producer of the catalog (which shows many previously unattributed carnival patterns) and telling us why they are "almost" certain Rosice U Brna, a large Czechoslovakian glass manufacturer, was that author of the catalog. They are keeping both titles for these patterns until they have absolute proof.

Please let us know if you find any mistakes or omissions. If you have an unlisted vase, send us a picture and we will research it. We would appreciate receiving pictures of vases not pictured. Remember that new European vases are still being discovered, so the list only contains the vases we know today.

Our thanks to Glen and Steve Thistlewood and their fellow researchers (including the Hodgsons, Hamiltons, and other members of CGS-UK) for their discoveries of new carnival glass producers as well as new vases. We also thank Glen & Steve Thistlewood for answering our many questions about the vases. Without their research, this list would be much shorter!

We also wish to thank Kathi and Galen Johnson who sold us a dozen vases that we did not have (They make periodic trips to England and bring back carnival glass). We also thank Joan Doty for providing several pictures. All these additions have required a major revision of this brochure. As more major revisions are required we will provide free updates to those who take advantage of our offer to send FREE PDFs of the brochure to anyone who emails us at [jnie222@bellsouth.net](mailto:jnie222@bellsouth.net).

## **Index to European Vases (Revised August, 2014)**

By Loretta & John Nielsen

<u>Common Name (Alternate Names)</u>	<u>Company</u>	<u>Country</u>
African Shield	Sowerby	England
Aiglon	Inwald	Czechoslovakia
Albian	Riihimaki	Finland
Amazon Women	Riihimaki	Finland
Arches and Whirling Star	Unknown	
Asters (Marguerite)	Brockwitz	Germany
Athens	Hortensja	Poland
Band of Ovals	Rosice	Czechoslovakia
Banded Diamonds and Bars	Inwald	Czechoslovakia
Bay Leaves	Inwald	Czechoslovakia
Bell Flower	Unknown	
Berlin	Eda Glasbruk	Sweden
Bethany's Diamond Earrings	Rindskopf	Czechoslovakia
Bishop's Mitre	Riihimaki	Finland
Bohemian Paneled Eights	Inwald	Czechoslovakia
Bohemian Diamonds	Rindskopf	Czechoslovakia
Bond (Boston)	Brockwitz	Germany
Bremen	Brockwitz	Germany
Bristol	Eda Glasbruk	Sweden

Bryony Star	Rosice	Czechoslovakia
Cane Panels (Paneled Cane)	Rindskopf	Czechoslovakia
Chevrons	Walther & Sons (?)	Germany
Circle Squared	Inwald	Czechoslovakia
Circles and Grooves (Pisa)	Walther & Sons	Germany
Classic Arts	Rindskopf	Czechoslovakia
Curved Star (Zurich)	Brockwitz	Germany
Dagny	Eda Glasbruk	Sweden
Daisy	St. Gobain/Coty	France/Brazil
Danube	Inwald	Czechoslovakia
Davann	Hovmantorps Nye Glasbruk	Sweden
Deco Mirrors	Rindskopf	Czechoslovakia
Deco Stripes, Deco Leaves, Deco Star	Hortensja	Poland
Decoratif	Unknown	
Delphine	Zabkowice	Poland
Derby (Pinwheel)	Sowerby	England
Derbyshire (Beaded Swag Medallion)	Unknown	
Diamond Cut	Hortensja	Poland
Diamond Cut (Edward)	Inwald	Czechoslovakia
Diamont - see Half Diamont		
Dorota	Hortensja?	Poland?
Double Tulip	Rosice	Czechoslovakia
Dragon Vase (Paneled Dragon)	Unknown	
Dragonfly and Daisy	Unknown	
Dresden Drape	Inwald	Czechoslovakia
Edla	Eda Glasbruk	Sweden
Egyptian Queen	Rindskopf	Czechoslovakia
Eight Rings	Unknown	
Elektra	Brockwitz	Germany
Elektra (Stars & Pendants, Whirligig)	Riihimaki	Finland
Falling Stars	Riihimaki	Finland
Fine Cut Rings	Unknown	
Fine Flowers Border	Rindskopf	Czechoslovakia
Fine Rings (Fine Cut Rings)	Inwald	Czechoslovakia
Fingals vase	Morawski	Poland
Fir Cone	St. Gobain/Coty	France/Brazil
Fleur De Lis	Inwald	Czechoslovakia
Floral Sunburst (Tusenskona, Daisy Spray))	Eda Glasbruk	
	Sweden	
Footed Prisms (Footed Prism Panels)	Brockwitz	Germany
Forty Niner - See Royal Diamonds		

1465	Rosice	Czechoslovakia
Four -Sided Tree Trunk	Unknown	
George	Brockwitz (?)	Germany
Giant Lily	Libochovice	Czechoslovakia
Grada	Eda	Sweden
Half Diamont (½ Diamont)	Eda Glasbruk	Sweden
Hazel	Hovmantorps Nye Glasbruk	Sweden
Heavy Prisms	Unknown	
Heavy Vine	Rosice	Czechoslovakia
Inca Vase	Libochovice	Czechoslovakia
Jacobean (Lord, Milord)	Inwald	Czechoslovakia
Josef's Plumes	Walther & Sons	Germany
Juliana	Riihimaki	Finland
Jupiter	Riihimaki	Finland
Kaaro (Riihimaki)	Riihimaki	Finland
Karelia Sweet	Riihimaki	Finland
Karhula 4935	Karhula	Finland
Karve	Elme	Sweden
King James (not confirmed)	Rindskopf	Czechoslovakia
Knobs	Faglaviks	Sweden
Kulor	Eda Glasbruk	Sweden
Lady Fingers (Daisy Rose)	Unknown	
Lattice and Leaves	Brockwitz	Germany
Laurel Wreath (Banded Laurel Wreath)		Unknown
Laurier Nelly	Inwald	Czechoslovakia
Little Leaves	Riihimaki	Finland
London	Rosice	Czechoslovakia
Lotus Vase	Unknown	
Lourdes	Libochovice	Czechoslovakia
Lynx	Riihimaki	Finland
Mailand	Walther	Germany
Manchester	Molineaux Webb	England
Marguerite	B. Morawski	Poland
Marianna	Rindskopf	Czechoslovakia
Melting Ice vase	Zabkowice	Poland
Miriam	Eda Glasbruk	Sweden
Mistic	Unknown	
Moonprint (Globus)	Brockwitz	Germany
Mulberry Bush	Riihimaki	Finland
Nanna	Eda Glasbruk	Sweden
Nola (Paneled Twigs, Pompei)	Inwald	Czechoslovakia

Nora	Karhula	Finland
Nordstern	Malky	Germany
Palapeli	Karhula	Finland
Pauline	Zabkowice	Poland
Peacock Feather (not confirmed)	Thomas Webb & Son	England
Pebble and Fan	Libochovice	Czechoslovakia
Pinwheel	Inwald	Czechoslovakia
Pinwheel	Hortensja	Poland
Poppy Spray	Faglaviks	Sweden
Prague	Inwald	Czechoslovakia
Princeton (Coronet)	Inwald	Czechoslovakia
Reflections	Inwald	Czechoslovakia
Regal Tulip	Rosice	Czechoslovakia
Regina's Star	Brockwitz	Germany
Rekord (Diamond Wedges)	Eda Glasbruk	Sweden
Rex	Eda Glasbruk	Sweden
Ring-Around (Regina, Panel & Dart)	Zabkowice	Poland
Ring of Stars	Rosice	Czechoslovakia
Rising Comet	Hortensja	Poland
Rom	Walther	Germany
Rosario	St. Gobain/Coty	France/Brazil
Rose and Drape	Zabkowice	Poland
Rose Garden (Rosen, Rose Marie)	Brockwitz	Germany
Rose Garden (Rosor)	Eda Glasbruk	Sweden
Royal Diamonds (London, Forty Niner)		Rosice Czechoslovakia
Royal Pineapple	Canning Town	England
734	Krosno (?)	Poland
Shield Vase	Unknown	
Schmalzie	Riihimaki	Finland
Sea Gulls	Libochovice	Czechoslovakia
Shooting Stars	Hortensja	Poland
Six Fasett	Eda Glasbruk	Sweden
Sophia	Elme Glasbruk	Sweden
Sowerby Drape (Lady Cynthia)	Sowerby	England
Spears and Diamonds (Auckland)	Unknown	
Spinning Star	Karhula	Finland
Spinning Starlet	Karhula	Finland
Spiral	Faglaviks	Sweden
Square Diamonds (Column Flower)	Brockwitz	Germany
Square Diamonds (Column Flower)	Riihimaki	Finland
Star Vase	Unknown	

Starburst and Crown (Chicago)	Riihimaki	Sweden
Starburst/Double Starburst (Kero)	Riihimaki	Finland
Starburst and Diamonds (Victoria, Kero))	Riihimaki	Finland
Starlight	Karhula	Finland
Stella	Eda Glasbruk	Sweden
Sumptuous	Rindskopf	Czechoslovakia
Sunflower and Diamonds	Brockwitz	Germany
Sunflower and Diamonds (Souros)	Eda Glasbruk	Sweden
Susanne	Faglaviks	Sweden
Svea	Eda Glasbruk	Sweden
2108	Zabkowice	Poland
Tartan (Daisy & Cane, Kopenhagen)	Brockwitz	Germany
Tennessee Star	Riihimaki	Finland
Texas Tumbler	Brockwitz	Germany
Thistle	Canning Town	England
Thorne (Luttich)	Walther & Sons	Germany
Tokio	Eda Glasbruk	Sweden
Tornado Variant	Thomas Webb & Son	England
Towers	Thomas Webb & Son	England
Triands	Brockwitz	Germany
Trio	Eda Glasbruk	Sweden
Tropicana	Unknown	
Vera	Hovmantorps	Sweden
Vining Leaf	Rosice	Czechoslovakia
Western Sunflower	Hovmantorps	Sweden
Western Thistle (Kukka)	Riihimaki	Finland
Winged Deco	Rindskopf	Czechoslovakia
Wide Panel and Diamonds	Unknown	
York	Eda Glasbruk	Sweden
Zee Four (Z4)	Eda Glasbruk	Sweden
Zero	Eda Glasbruk	Sweden

## GERMANY

**Brockwitz (Attributes: ground bases, marigold & blue only)**

### **Asters ( Marguerite)**

This is a small fan or letter vase in marigold (similar to Rose Garden letter vases) with three large flowers. There is a picture of the vase on the Thistlewood's website. Here is a picture of

the chop plate to show the pattern. A vase picture is also in *Century*.

**Bond (Boston)**

This is a small blue 6" vase with interlocking chevrons. On the left is the only picture of the vase we bought that we took before it fell off the table and broke!

**Bremen**

This is a marigold fan vase (one known) See picture in *Magic*.

**Curved Star (or Zurich)**

Curved Star comes in cylinder vases 7", 9", 11" high, and a celery vase ("Cathedral Chalice"), both in marigold and blue

This pattern was also made by Eda. The Brockwitz version has a file pattern on the claws, the Eda version does not. See *Century*, page 109, for a discussion of the several possible makers and the differences between the pieces from each maker.

**George**

This is a rare marigold 6" cylinder vase with a waffle block type pattern. The Hodges have found an identical pattern in the Brockwitz catalog but the vase is not shown, so they feel that their attribution is tentative. It is only pictured on the Thistlewoods website.

**Elektra**

The pictured massive 10" marigold & blue cylinder vases from our collection are shown in the Brockwitz catalogs (the same vases are shown in the Riihimaki catalogs).

**Footed Prisms (Footed Prism Panels)**

These are marigold & blue 9" & 13" vases. Marigold and blue vases from our collection are pictured on the right.

**Lattice & Leaves**

This vase is similar to the Footed Prisms vase. It comes in 9" marigold & blue A marigold vase from our collection is pictured on the left.

**Moonprint (Globus)**

Cylinder & footed vases come in four sizes, all marigold. Pictured here from our collection are the two large vases and one of the small squat vases. There is another small vase that we have not seen

**Regina's Star**

This is a blue square vase. The first one known is owned by Sherry & Dick Betker and was named by them after his mother. The 9" vase pictured on the right is a second one which recently sold on eBay.

**Rom**

The Brockwitz version does not have a vase. See Walther for an identical pattern name with a vase.

**Rose Garden (Rosen, Rose Marie)**

Rose Garden is a well known vase which comes in a squat flower vase in marigold & blue, 5.5", 7", and 9" fan vases and 7", 9", and 11" cylinder vases, marigold & blue. The squat vase is pictured on the right, the cylinder vase to the far right. Fan vases, 6" and 9", are pictured below; for the Eda Glasbruk version see Dagny ( under Eda).

**Square Diamond (Column Flower)**

This 8" vase comes in marigold & blue. It is a square vase as shown and was also made by Riihimaki in marigold (design differences are pointed out in the Thistlewood's Riihimaki

CD).. The vase pictured on the right is a recent addition to our collection.

### **Sunflower & Diamond**

This is a cylinder vase, 6" & 8" tall in marigold and 9" tall in marigold & blue. The Brockwitz version is part of Marguerite pattern and has 36 petals on the flowers (Eda made a 7" tall version with 20 petals and coarse filing.). The marigold Brockwitz version in our collection is pictured on the left (we have never seen an Eda vase in this pattern).

### **Tartan (Daisy & Cane, Kopenhagen (Ger), Olympia.**

This is a slim 9" marigold footed vase. The one in our collection is shown in the picture on the right. A cylinder vase is shown in the Brockwitz catalog but has not yet been found iridized.

### **Texas Tumbler**

This is actually a celery vase in the Brockwitz Northern Lights pattern. The piece comes in marigold & blue and according to the Thistlewoods in *Art* one of its uses was to be for washing grapes! A marigold Texas Tumbler is pictured on the left.

### **Triands**

This vase is known only in marigold and comes in a 4" celery vase as shown on the right..

August Walther & Son/Sachsenglas

**Circles & Groove (Originally Pisa)**

Like most of Walther's vases, this is a large & heavy marigold vase (about 7.5" tall and 5" wide at the top) made of thick glass. It was made by VEB S□schenglas, the successor to Walther. Pictured on the left is a vase from our collection

**Josef's Plumes**

This is a footed, funnel-shaped vase in marigold, pink, clear, & vaseline. It is 9" tall and has a ground base. Pictured on the right is a vase from our collection.

**Mailand**

This is 5inch tall marigold vase with a 3.25inch top opening. It has a plain bottom and is made of heavy glass. Pictured on the left is one from our collection (thanks to the Johnsons).

**Rom**

This is a large marigold vase made of thick glass. It is 8 inches tall and has a top opening of almost 6 inches. The bottom is plain. Pictured on the right is a vase from our collection (again thanks to the

Johnsons).

### **Thorne (Luttich)**

These are marigold large & mid-size vases made of heavy glass. The pictured vase on the left is from our collection and is about 8” tall and 5½” wide at the top.

### **Chevrons**

This is a vase in a simple cylinder shape with multiple ribs crossing the vase in a zigzag pattern. It is pictured in *Century*, but in *Art* the possible producer is changed to Walther & Sons

### **Malky**

### **Nordstern (North Star)**

This is a marigold vase with whirling rays. Both the vase and the German CG maker are shown in the May 2014 CGS newsletter.

## **ENGLAND**

### **Canning Town Glass Works**

#### **Royal Pineapple**

This is the larger of the two vases. It is found primarily in marigold but a few gray-blue examples have been found recently in England. It is the larger of the two vases pictured to the right.

#### **Thistle**

This is an 8" vase found in marigold, smoke, & gray-blue. It is the smaller of the two vases pictured to the right.

### Molineaux Webb & Co,

#### **Manchester**

This is an amber vase with a scalloped foot and horizontal ribs. It is pictured in *Century*.

#### Sowerby

#### **African Shield**

This is a small squat vase with shields on the side. It usually comes with a metal grill that fits in the top to hold flowers. It is pictured on the left.

#### **Derby (Pinwheel)**

This vase has a domed base and comes in marigold, amethyst, BA, and a rare blue. Sizes known are 6.5", 8", and 10.5" tall. Shown here are 6.5" amethyst and 8" marigold vases from our collection. Hortensja and Inwald also made versions with ground bases which they called Pinwheel. See the Thistlewoods website for an article on the differences between makers.

#### **Sowerby Drape (Lady Cynthia)**

As far as we know, this vase is known only in black amethyst, a scarce color for European or English manufacturers. It is 10" tall and has a pedestal foot. The top can be cupped in or flared out. Shown here is a vase from our collection which we purchased from Pam & Mike Mills. We consider it Sowerby's finest vase.

## Thomas Webb & Son

### **Peacock Feather**

In *Century* the Thistlewoods show a picture of this rare vase and suggest it may have come from Thomas Webb & Sons.

### **Tornado Variant**

Footed 12" Tornado vases made without mold lines are believed by the Thistlewoods to have been made in Stourbridge, England, by Thomas Webb and Sons. As shown in the picture of the two English Tornado vases in our collection, some of them had green or Vaseline tornados. There is also a footed variant with mold lines believed to have been made by Northwood.

### **Towers**

This is a small ribbed celery vase which comes in marigold and blue. The picture is from a vase which appeared on eBay. See *Magic* for a discussion by the Thistlewoods of possible English producers of other iridized vases such as Derbyshire..

## Poland

Catalogs recently discovered in Poland have revealed that two companies, Hortensja and Zabkowice, made many of the patterns in carnival glass that could not be found in

other companies' catalogs (including many of the "Golden" patterns). An article in the CGS-UK May 2012 newsletter by John Hodgson stated that he had purchased additional catalogs showing more Polish manufacturers of existing carnival glass vases of unknown origin; they are listed and pictured below (thanks to permission from Glenn Thistlewood and John Hodgson).

## Hortensja

### **Athens**

This is a marigold cylindrical vase shown only on the Thistlewoods website.

### **Dorota**

This is a small marigold vase found in Poland and pictured only in the March 2013 CK Newsletter. It has a six-sided base and a pattern similar to the Hortensja Pinwheel vase. It is not in the Hortensja catalogue so the attribution is tentative..

### **Deco Stripes, Deco Leaf, Deco Star**

These three 10" footed marigold or frosted vases have similar shapes with different designs.

We show in the picture below two of the patterns (Deco Stripes on the left, Deco Leaf on the right) that we saw in a Seek auction in Texas and were able to buy with mail bids. We have not seen a picture of Deco Stars.

### **Diamond Cut**

These are 6"-14" cylindrical marigold vases with vertical ribs separated by panels containing fan shapes, file sections, and ribbon-like areas. This pattern was also made by Inwald. We show a picture in the Inwald section.

### **Pinwheel**

These are Marigold 5", 6" 8" 10" 12", 14" vases with a ground base. The pattern was also made by Inwald and Sowerby (who named it Derby) so it is uncertain who made the various sizes except for the 5" size, which was only shown in Hortensja catalogs. There is a picture of the 5" vase in *Magic*.

### **Rising Comet**

This vase comes in marigold in 6", 8", & 10" sizes. The vase from our collection shown here on the left resembles rocket trails or shooting stars.

### **Shooting Stars**

This is another marigold vase identified by John Hodgson in his article; it is pictured on the right with Mr. Hodgson's permission.

## **B. Morawski**

### **Marguerite**

This vase, previously a possible Brockwitz product, appeared in the catalog of this Polish manufacturer. It is shown on the right.

### **Fingals**

This vase was described in the article by John Hodgson and is pictured on the left with his permission..

## Zabkowice

### **Pauline**

This marigold vase was pictured in the November 2012 CGS UK newsletter and is in the Thistlewood's collection.

### **Ring-Around (Regina, Panel & Dart)**

This is an 8" marigold vase that is pictured and discussed in the August 2012 CGS UK newsletter

### **Rose & Drape**

This is a marigold vase that comes in 4.5", 6", & 7.5" sizes. All have a ground base and have an unusual three-fluted scallop on the top. The pattern consists of vertical panels and a draped band containing roses circling the middle of the vase. We saw the pictured vase in the Meeker auction but did not realize it was so rare, so we did not buy it. We have not seen another in person!

### **Delphine**

This is another marigold vase described by John Hodgson and is pictured on the right with his permission.

### **Melting Ice**

Another marigold vase described by John Hodgson and pictured on the left with his permission.

### **France**

#### **Saint Gobain/Coty**

#### **Fir Cone**

This is a large and impressive vase that may have the words “France” and “Coty” molded into the base. The Thistlewoods have done research that indicates that while the earlier crystal versions may have been made in France, the iridized versions were made at a Coty plant in Brazil in the 1960s and 1970s. Pictured on the right is a vase from our collection.

#### **Rosario**

This vase was also found in Brazil and has the unusual fluting on the top also found on the Fir Cones vase. A pair from our collection is pictured below.

## Daisy

This is another vase that was found in Brazil and seems to have the same fluting on the top as that on the Fir Cone vase. It is pictured on the right.

## SWEDEN

### EDA Glasbruk

#### **Berlin**

This is a marigold cylinder vase with a simple block pattern similar to Ranger. It is pictured on the left. It was also made by Karhula.

#### **Bristol**

The only known Bristol vase is pictured in the Thistlewoods Eda CD.

#### **Dagny**

This is Eda Glasbruk's version of the Curved Star vase. The pattern is the same as Curved Star but the vase has a plain band around the base (and no file on the claws). It comes in marigold & blue 8" cylinder vases. Pictured on the right is a blue Dagny vase from our collection.

#### **Diamont/(Half Diamont)**

We have a Diamont bonboniere but did not realize a Half Diamont vase existed until Joan Doty sent us this picture of a 5.5" tall vase in her collection. It has a 2.63" base (picture reprinted with her permission).

#### **Edla**

This is a simple cone shaped marigold vase with a pattern made up of blocked squares. It is pictured in *Century*.

#### **Falling Stars**

This is an 11" marigold vase with a pattern covered with diamonds, filled with smaller diamonds with fans and overall sweeping lines. The only vase known

(owned by the Hodgsons) is pictured in the Thistlewood's CD on Carnival Glass in Sweden.

**Floral Sunburst (Tusenskoka)** These are 6", 7" and 8" vases in marigold, blue, pearl, purple, and pink. The top can be flared, incurved, tricornered, or spittoon to right are blue spittoon and flared-out, pearl spittoon, and marigold

flared-out vases as shown.

### **Grada**

This picture of a 5" Grada vase appeared on EBay. The dealer also included a catalog picture showing the vase as Eda 2168. This is actually the bottom of an Ostersund bonboniere by Eda. They gave it a separate pattern name and sold it as a vase!

### **Kulor**

This is a vase on a pedestal foot with a simple pattern of circles, but the iridescence can be outstanding. The top can be flared and the vase sizes are 6" & 8" in marigold, blue, pearl, & purple and 10" in marigold & blue. Rare

6" teal and green vases exist. Examples are pictured below.

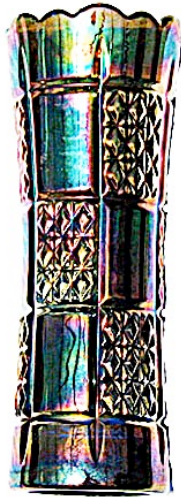

### Lynx

This 5" marigold vase is described and pictured only in the Thistlewood's Riihimaki CD. They named it "Lynx" because some examples have the Riihimaki lynx trademark molded on the base.

### Nanna

These vases come in Lilac, marigold & blue. They come in one shape, 6" tall with a squeezed-in neck. Pictured on the right are blue and marigold vases from our collection

### Rekord (Diamond Wedges)

This is a blue 8" vase that usually has outstanding color. The pattern consists of colored squares alternating with squares filled with diamond shapes.. We consider ourselves fortunate to have acquired the one on the left.

### Rex

This vase comes in several sizes (3.5" 5", & 8" tall) and several colors (marigold, blue, pearl, purple). It also comes with the top in different shapes. Pictured on the right are a marigold 3½" spittoon shaped vase and a blue 5" vase with a turned-in top.

**. Rose Garden (Rosor)**

Eda Glasbruk's version of Rose Garden is shown in their catalogs only in the fan shape (also known as a letter vase). The vases seem to be identical to those produced by Brockwitz so they may have acquired the molds from that company. Vases come in marigold and blue, 5", 7", and 9" high.

**Six Fasett**

This is a plain marigold or blue vase with six vertical panels running from top to bottom of the vase. A dealer has just pictured the first pearlized vase on EBay.

**Stella**

This 8" vase, pictured on the right, was offered to us by a dealer in Sweden. It was found in an Eda catalog by the Thistlewoods as described in their CD on Swedish Carnival Glass.

**Sunflower & Diamonds (Souros)**

This is a cylinder vase in marigold, blue, & purple. The Eda version has 20 petals on each flower; the Brockwitz version has 36 petals. Of course, the purple example from our collection we show on the left also had to be made by Eda because Brockwitz did not make carnival glass in purple.

**Svea**

These are marigold, blue, pearl & purple vases with large oval diamond shapes. They come in a variety of shapes, small with a plain band at the top or tall, both with tops sometimes flared or turned in. Pictured left to right below are two banded blue 4" vases (flared & turned in) & two 10" marigold vases.

**Tokio**

This is a 7" to 8" cylinder vase that comes in marigold, blue, and pearl. The pattern consists of a series of overlapping squares which show off the iridescence very well. There is a symbol on the base that looks somewhat like a backward swastika, but the arms are curved and small stars appear in each arm.

**Trio**

This is a blue 9" vase with two rows of vertical fan shapes separated by a center bar. A bowl in the pattern is pictured in *Century* but the vase pictured on the right (which appeared on eBay) is not in any reference that we can find.

**York**

This is a tall marigold vase with overlapping ridges. We have only seen the two shapes shown here.

**Zee 4 (Z4)**

This is a marigold 4.5 \ " vase the come as a column

shape with a pinched-in top or as a vase with a bulbous lower section and columnar top. It is pictured in the Thistlewood's CD on Carnival Glass in Sweden.

**Zero**

Very plain 4" and 6" marigold vases, early examples. See *Century* page 109

**Elme Glasbruk – Sweden**

**Sophia (Ranka)**

This is a pale amber-pink small vase on a pedestal foot with a square base. It is pictured on the right.

**Karve**

This is a small, pale lilac vase with a "toffee" iridescence and a tulip design. Because the glass color resembles that used by Elme, the Thistlewoods have tentatively put Karve as a possible Elme Vase. It is pictured on the left.

**Hovmantorps - Sweden**

**Davann**

Davann is a cylindrical 6½" or 8½" vase that may have several neck treatments. It is known only in pink/amethyst base glass with a light amber overspray as pictured on our vase to the right. The pattern includes a large flower with a perfect square in the center, which makes it easy to identify.

**Hazel**

Hazel has diamond shapes alternating with fans on a 6" marigold vase. It is pictured only in the Thistlewoods new CD, "Carnival Glass in Sweden."

**Vera**

This cylinder vase with 6 panels has a round pedestal foot. There is a tree branch in each

panel. It is listed in 5½” and 7½” sizes in BA and is pictured on the left.

### **Western Sunflower**

This vase pictured on the right comes in a pale amber-lilac glass with pattern elements similar to Davann vases and has been confirmed as a Hovmantorps product by a former worker..

## **Faglaviks - Sweden**

### **Knobs**

This is a green vase with a ground top and similar iridescence to Poppy Spray. It is not in the Faglaviks catalog but seems to be one of its products due to color and having a ground top.. It was found in Sweden and we purchased it. It is pictured on the left.

### **Poppy Spray**

These are tall green & amethyst vases that bulge out and go up to narrowed necks. The pattern features large poppy flowers. A green one we recently purchased is pictured on the right (an amethyst Poppy Spray vase in the 2014 Lincoln Land auction sold for \$750). All Faglaviks pieces are ground on the top. Some like Poppy Spray have the pattern extend to the bottom.

### **Spiral**

The pattern on this amethyst vase looks like a series of open spirals. There

are two shapes known, a squat vase that has been pushed down into a bulbous shape with a flared top, and a taller vase (pictured only in the Thistlewoods new CD, "Carnival Glass in Sweden.") that tapers to the top. Like Poppy Spray, it has a ground top and the pattern goes to the bottom of the piece. Pictured on the left is the vase in our collection

### **Susanne**

This is an amethyst vase with a tapering shape and a spread top. The pattern goes down around into the base like that in the Spiral vase and the Poppy Spray vase.. The picture on the right was taken from a museum brochure.

## **CHECHOSLOVAKIA**

### **Inwald**

#### **Aiglon**

This is a rare marigold vase. It is mentioned but not pictured in *Century* (page 53)

#### **Banded Diamonds and Bars**

This is a marigold cylinder vase in two sizes. The 10" vase pictured on the left is from our collection. again thanks to the Johnsons (who bought it from John Hodgson)., Another shape, an inverted cone, was discovered by the Martin & Jan Hamilton in England and pictured in the May 2014 CGS newsletter. According to Glen Thistlewood that shape is a celery vase or grape washer.

#### **Bay Leaves**

This is a marigold 8" footed vase, one known. The design consists of a series of horizontal panels containing large bay leaves, separated by recessed panels. It is pictured

in *Magic*.

### **Bohemian Paneled Eights**

This is a marigold footed vase that was discovered by Gale Eichhorst and is pictured on the right.. Gale tells us he now knows of two or three more.

### **Circle Squared**

This is an unusual marigold vase that is square and has four sides filled with loops and circles, all sloping down to a pedestal eight-sided foot. It is pictured in *Magic*.

### **Danube**

This is an 11.5" high marigold vase in a cylinder shape. As pictured here, it has a series of vertical star shapes around the body, with rings above and below the stars. Three sizes are also shown in the Hortensja catalog. Thanks to Joan Doty for the picture

### **Diamond Cut (Edward)**

Pictured on the right is a large and heavy 12" marigold vase from our collection. This vase was certainly made by Inwald, but the Hortensja catalog shows the same design in 6", 8", 10" and 14" tall sizes. A similar vase was also made by Crown Crystal in Australia but the pattern is slightly different.

### **Dresden Drape (Four Garlands)**

This vase had no original name, but was given two names independently by two collectors. It is a 7" marigold vase with a pedestal foot and draped garland around the flared top. Thanks again to Joan Doty for the picture.

**Fine Rings (Fine Cut Rings)**

This is a small marigold vase in the celery vase shape. It is pictured in *Century*.

**Fleur-De-Lis**

This can be a large and heavy 13" tall marigold vase as shown by the picture of the vase from our collection. It also comes in a 6" tall size (also pictured), an 8½", and a 10" that are much harder to find. Both vases shown are in our collection.

**Jacobean (Lord, Milord)**

This vase, sometimes called Jacobean Ranger, has a simple pattern of blocks that is easily confused with similar patterns such as Blocks and Arches. It comes in both a cylindrical and a rounded vase as shown on the left.

**Laurier Nelly**

This is a large and heavy marigold vase, 7.5" tall and 4¾" across the top. It has a eight panels of laurel leaves circling the lower portion. The picture on the right of this rare 8" vase is from our collection. It also comes in a 7.5' footed and a pedestal vase..

**Nola (Paneled Twigs, Pompei)**

The Nola pattern was first found in a pitcher by Nola Schmoker in Oklahoma. This is a 10" tall marigold vase covered with odd markings. It has eight paneled sides sloping down to a square base.

### **Pinwheel**

This is a marigold 8" vase, also made by Sowerby & Hortensja. If the bisected small diamonds have indented triangles it is Inwald or Sowerby. We listed the vase as Derby in Part 1 under Sowerby. We are showing the 8" marigold vase here, although we think it is from Sowerby. See *Magic* for a detailed discussion of the differences in vases by the three companies.

### **Prague**

This is a rare marigold 7" vase which is known in several shapes, a straight vertical cylinder or with the sides bulging out. The top may be incurved or flared. The pattern consists of a series of vertical panels with double lines crossing around the center. The vase the Johnsons sold us is on the left.

### **Princeton (Coronet)**

Princeton is a marigold vase which comes in three sizes, 10.5", 8" and 5.5" tall. On the right is a picture of all three sizes in the collection of Joan Doty (printed with her permission).

### **Reflections**

Reflections is a marigold 7" tall cylindrical vase with a pattern consisting of vertical panels crossed by two lines of double ribs. It is pictured only in Network Special

### **Rindskopf –**

### **Czechoslovakia**

### **Bethany's Diamond Earrings**

A marigold 6½" vase in Rindskopf's 1999 pattern with "Made in Czechoslovakia" molded into the base. I have only seen it pictured and described in the August 2013 CGS newsletter.

### **Bohemian Diamonds**

This marigold 8" vase was also pictured in the August 2013 CGS newsletter.

### **Cane Panels (Paneled Cane)**

Cane Panels is a tall slim cylinder vase with vertical panels that alternate between plain ones and panels filled with geometric symbols. The 8" tall marigold vase pictured here is from our collection and is the only size found iridized so far, although other sizes are shown in Rindskopf catalogs.

### **Classic Arts**

Classic Arts and Egyptian Queen are similar in that both have a band of green staining containing figures over a marigold vase. In Classic Arts the figures are playing instruments and dancing as pictured on the left. The vase is 7½" tall.

### **Deco Mirrors**

This is a rare marigold vase that is mentioned only in the Thistlewoods Network Special #1, where on page 7 they show a picture of a tumbler.

### **Egyptian Queen**

As mentioned above, this marigold vase is similar to Classic Arts except here the green panel has Egyptian figures playing harps and other instruments. The vases come 6" & 7.5" tall; we picture on the right a vase from our collection that is 7½" tall and about 3¼" wide at the top.

### **Fine Flowers Border**

This is a 6.5" tall marigold cylinder vase with vertical rows of crosses around the sides and odd figures at the top & bottom. It is pictured in *Magic*.

### **Marianna**

This is a marigold 8" vase that turns out at the top and the foot. The pattern consists of vertical panels with fan shapes between two circles of ribbed bands. The one in our collection is pictured on the right.

### **Sumptuous**

This is a 6" marigold vase on a square pedestal (one known)  
It is pictured in *Century*.

### **Winged Deco**

This is a marigold vase in the Art Deco with glass "wings" for handles. Only one iridized vase is known, a catalog cut is pictured in *Century*

## **Libochovice (Czechoslovakia)**

In "Carnival Glass, The Magic and the Mystery 2," the Thistlewoods announced the discovery of a catalog for Libochovice Glass Company in Czechoslovakia. Based on the Art Deco work in the catalog and their studies, the Thistlewoods have tentatively listed the following vases as made by Libochovice. All have a typical flange type outlet on top and all have Art Deco type styling.

### **Giant Lily**

This is a large bulbous vase, 9" high and 27" in girth, that comes in marigold and black amethyst. Many have markings showing they were made in Czechoslovakia. Pictured on the right is the only known BA vase from the collection of Bob & Sandy Sage.

### **Inca Vase**

Another bulbous vase, 12" high and 32" in girth, that comes in marigold, black amethyst, cobalt blue (and non-iridized vaseline). On the left is a marigold Inca vase from the collection of Bob & Sandy Sage.

### **Pebble & Fan**

This is still another bulbous vase measuring about 12" high and 23" in girth. It comes in marigold, amber, blue, and vaseline. Pictured are marigold and blue vases formerly in our collection.

### **Seagulls**

This is another bulbous vase measuring 11" high and 30" in girth. It comes in marigold, vaseline, aqua, black amethyst, and light blue. A marigold over vaseline vase is pictured here.

## Lourdes

This is a small bulbous vase with a series of melon ribs making up the body. It is known only in black amethyst. It is pictured in *Magic*.

## FINLAND

### Riihimaki

#### Albian

These are blue or marigold bowls 3.5 or 5.5" tall. They have the molded trademark KAUKLAHTI molded into the base. The top may be flared out or cupped in; we picture on the left a blue 3.5" cupped in bowl we just purchased.

#### Amazon Women

This is an unusual amber-pink 8" vase with a band showing warrior women around the center. There is only one known, it is pictured in *Magic*.

#### Bishop's Mitre

These 8" vases, some with flared top, have four sets of pointed crossed arches for a pattern. They come in marigold, blue, and green and may have Riihimaki molded on the base. Pictured here are marigold and blue vases from our collection.

#### Elektra (also made by Brockwitz)

This is a 10" vase in marigold, blue & amber which is a cylinder which swells out in the middle. Double swirling stars alternate around the vase with triple flowers or stars. The neck may be squeezed in or straight. A marigold

and a blue vase from our collection are pictured on the left.

### Juliana

This is a simple cylinder vase that only comes in blue (or a special iridescence shown in *Art*) and in one shape. The pattern consists of six vertical panels with stars at the top, as shown on the right

### Jupiter

This small vase (usually about 5" tall) comes with variety of top treatments, including flared out, turned in, and spittoon neck. It comes in marigold, blue, amber-pink with marigold overlay. In *Art*, page 150, the Thistlewoods show an unusual 3" vase with a cameo pattern and bottle neck. We show on the right two blue Jupiter vases from our collection with different top treatments.

### Kaaro (Riihimaki)

This vase received its name because it has "RIIHIMAKI" molded into the base. We recently purchased the blue example shown on the right from an eBay seller.

VA 260 Blue Riihimaki  
/ase

### Karelia Sweet

This is a 4" vase found in marigold, blue & amber. The Thistlewoods found the first one in Karelia Province in Finland & named it after the Karelia

Suite that Sibelius composed in that province. It is tiny but very attractive. Note the different shaping on the marigold and blue examples on the left.

**Little Leaves –**

This rare blue 5” vase (only three known) has a vertical leaf pattern with different neck treatments. Pictured vase on the right is from our collection.

**Mulberry Bush**

This marigold 7¼" footed vase (the only one known) was named by the Bookers because it shows figures dancing around the band. It was in the Leonard's collection and appeared in the 2012 ICGA auction. It is now in our collection

**Schmalzie**

A blue vase is pictured in *Art*, page 145, described as the only one known. The marigold vase in this pattern pictured on the right recently appeared on EBay. It was chipped in several places and had a high price so we did not buy it. There are now several known, including one in amber.

**Starburst & Double Starburst (Kero)**

We picture above a blue 10” Double Starburst vase and 5.5” blue and marigold Starburst vases. This vase has alternates whirling buzz stars and 8-pointed stars around the body of the vase. The smaller 5.5” tall size has a single row of alternating patterns while

the larger 10" size has two rows of the pattern. The vase comes in marigold, blue, & amber and has a number of different treatments of the top.

### **Square Diamonds (Column Flowers)**

This is a square vase in marigold & blue that is covered with an intricate pattern. Although scarce, it appears in both the Riihimaki and the Brockwitz catalogs, so the mold may have been passed from one to the other. The vase in our collection is pictured on the right.

### **Starburst & Diamonds (Starburst, Kero, Victoria)**

Starburst and Diamonds is a footed vase that has the familiar alternating buzz star and eight-pointed star around the body and has a diamond band below the main pattern. It comes in marigold, amber, and blue. We picture it on the left.

### **Star burst and Crown**

This is a blue miniature vase. Pictured on the right is a vase from our collection.

### **Tennessee Star**

This vase appears in eight shapes, some 7.5-8" tall and some shaped examples. Marigold, blue, amber & amethyst examples are known. The vase is covered with stars, file, and interlocking shapes. We picture some examples below.

### **Western Thistle (Kukka)**

This is a common small vase produced in at least 11 different neck treatments. It comes in marigold, blue, amber, pink with marigold overlay. We picture on the right marigold and blue vases in different shapes.

## **Karhula**

### **Karhula 4935**

This is a small vase described in the Thistlewood's Karhula CD. This vase appears in the Karhula catalog #4935 and is reported in blue.

### **Nora**

Nora is a tall marigold or blue vase with a spread base. The pattern has elongated ovals that go from the top to the bottom of the vase with fans at both ends. A blue vase is pictured on the left. So far we have heard of one blue and one marigold vase.

### **Palapeli**

This vase also appears only in the Thistlewood's Karhula CD. The vase appeared on EBay but the owner is unknown

### **Spinning Star**

This is an 8 - 9" tall vase known only in blue. It comes in one shape but the top may curve in, flare out, or be spittoon shaped. The picture on the right shows a vase from our collection.

### **Spinning Starlet**

This is a vase similar to Spinning Star but only 6" tall. It comes in marigold & blue and like Spinning Star may have different top shapes. The picture on the right shows a blue vase from our collection

### **Starlight**

Another "star" vase, 5" tall but with a detailed geometric pattern between crossing curves. It comes in marigold & blue and has the same three neck treatments as the previous vases. Again we show on the left a blue vase from our collection.

### **Rosice (Unknown Maker) - (Czech)**

How the title "Unknown Maker" differ from the "Unknown" listed below was explained in the introduction to this listing.. The cover of the catalog that was found in Czechoslovakia was missing and the company's name was not listed. The Thistlewoods now believe the company was Rosice U Brna in Czechoslovakia based on evidence they describe in the May 2013 CGS UK newsletter.

### **Band of Ovals**

This is a marigold 8" vase with the six-sided pedestal foot so often seen in this group. The pattern consists of vertical panels split by a band of oval shapes. The one pictured on the right is from our collection, again with thanks to the Johnsons.

### **Bryony Star (Herma)**

Bryony Star is an 8" marigold vase on a six-sided foot. A ring of points forming a star sticks out just above the foot and another recessed ring of points is at the top of the vase. It is pictured in *Magic*.

**Double Tulip**

This is a well known pattern that comes in 6" & 10" marigold vases (one purple vase has recently been found).. It has a ground base containing a multi-rayed star: the pattern shows a tulip with a mirror image. The top edge may be cupped in or flared. Pictured on the left is a 6" vase from our collection.

**Heavy Vine (Balmoral)**

The Heavy Vine vase is part of a pattern with wide range of shapes. The Balmoral name was given to the pattern by British importers who wanted to tie the pattern to royalty. The vase comes only in marigold and is just over 8" tall. The pattern consists of rectangular blocks with a vine figure circling around the middle of the vase. The vase pictured on the right is from our collection.

**King James)**

This footed vase has a pattern of interlocking squares similar to Inwald's Jacobean vase but with sunken channels between the blocks where the Jacobean has raised ribs.. It comes 6", 8", & 10" high; we picture our 6" vase on the left.

**London**

See "Royal Diamonds" below

**Regal Tulip**

This is a rare marigold 8.5" vase on a six-sided pedestal foot. The main design is a row of horizontal tulip shapes around the middle of the vase. There are six vertical

panels and a pinched-in top. On the left is a picture of the vase in our collection.

### **Ring of Stars**

This is a marigold 9" tall vase on a six-sided pedestal foot. It has six vertical panels and a band around the upper part containing a series of stars. The one pictured on the right we also bought from the Johnsons. It also comes with a frosted band.

### **Royal Diamonds (London, Forty Niner)**

This marigold vase is pictured iridized in the May 2013 CGS UK newsletter.

### **Vining Leaf**

This is a marigold 6", 8" or 9" vase on a six sided pedestal foot. It has a plain or frosted band around the vase containing curved figures. On the right are 8" vases with a frosted band and a plain band from our collection.

### **#1465**

This is a small marigold plain ribbed vase on a 6-sided fthat was given to us by Gale Eichhorst. The Thistlewoods were able to identify as #1465 in the Rosice catalog. It is pictured on the left.

### **Unknown**

These are vases where the maker is unknown or a possible maker is known but no proof exists.

### **Arches & Whirling Star –**

This is a 6” marigold vase with a ground base that was found in the UK. No others have been found. The pattern has large rising arches and whirling stars at the top. It is pictured in *Century*.

### **Bell Flower**

This is a square blue vase (two known) which resembles the Dragon vase discussed below. It appeared in a Remmen auction and is pictured in the Standard Encyclopedia of Carnival Glass.

### **Decoratif**

This bulbous ruby amberina vase, 7.5” tall and 26” in girth was discovered in France. It resembles in shape the Tropicana or Aztec vases, but has the molded words, “made in France” on the base. It is pictured in *Magic*.

### **Derbyshire (Beaded Swag Medallion)**

This 5.5” vase in marigold with an elaborate pattern is usually found in the UK. According to the Thistlewoods, it may have been made by Matthew Turnbull. It is pictured in *Magic*.

### **Dragon Vase (Paneled Dragon)**

This is a six-sided vase that is known in blue and black glass. This vase, like the Bell Flower vase, appeared in a Remmen auction. It is pictured on the left. One appeared on EBay in 2012 and sold for over \$1200.

### **Dragonfly & Daisy**

This is a marigold footed vase that was found and named by Sharon Mizell. With a six-sided pedestal foot and vertical panels plus a ring of “dragonflies” around the middle of the vase it resembles other “Unknown Maker” vases. We purchased the vase and it is shown on the right.

### **Eight Rings**

This purple vase is, just as the name says, made up of a series of horizontal rings and a flared top. On the base is stamped "THECO SLOVACIA" in black ink. It is pictured in the HOACGA Pattern Sheets, Vase Section, Item #400.

### **Fine Cut Rings**

This is a marigold celery vase with band of medallions (plain or with file filling) around vase. It was possibly made by Guggenheim in England, but no proof exists. It is pictured in *Century*.

### **Four-Sided Tree Trunk**

This is a square marigold vase with a rough bark-like pattern. It is also known in ruby flashed. It is pictured in *Century*.

### **Heavy Prisms**

This is a small marigold celery vase on a 3" diameter base. The piece from our collection is pictured on the left. It is also pictured in the HOACGA Pattern Sheets vase section, #136.

### **Lady Fingers (Daisy Rose)**

This is a rectangular marigold vase that in several areas of Europe. It has roses daisies on the other. Carwile lists it as the *Encyclopedia*. I cannot find any The vase from our collection is pictured

has been found on one side and Daisy Rose in other listing. on the right.

### **Laurel Wreath (Banded Laurel Wreath)**

This is a marigold footed vase on a six-sided rounded pedestal. It appeared on EBay and seems to be the same pattern as the Laurel Wreath bowl pictured in *Century*.

Pictured on the left is the EBay vase. I cannot find the vase in any reference books.

### **Lotus Vase**

This is a marigold footed vase we purchased from our friends from Argentina. The Thistlewoods have not been able to find it in any catalog so far. The picture is on the right.

### **Mistic**

This is the name given to the vase by the Thistlewoods until they are able to identify the maker. It was bought by the Johnsons in England and sold to us. It is 5.25 inches tall and has a plain bottom. It is pictured on the left

### **Shield Vase**

This is a vase that appeared on EBay. You are never sure they have used the right name, but we have not found a match so far. It is pictured on the right.

### **Spears & Diamonds (Auckland)**

This is a Marigold vase, 7" tall and 3¼" base diameter. It was first found in New Zealand but has been found in the UK. The pattern has spear-like notches and deep grooves. It is pictured in the HOACGA Pattern Series Vases Section, #330.

### **Star Vase**

This is another marigold vase that appeared in a Remmen auction. It is pictured on the right. The auction listed it as a Brockwitz item but it is not in any catalog.

### **Towers**

Towers is a small ribbed celery vase that comes in marigold and blue. Some evidence discovered by the Thistlewoods indicates that it may have been made by Matthew Turnbull. It is pictured on the right.

### **Tropicana**

This is a wide marigold vase 9" tall vase that has a collar top. The pattern includes a large tree and branches over horizontal rings. The top collar has a zigzag pattern. There are only a few known. It is pictured on the left.

### **Wide Panel & Diamonds**

This is a 6.25" tall BA vase standing on a round pedestal foot. Six panels rise from the foot and then a diamond pattern covers the rest of the vase. The one known vase was found in the UK. It is pictured in *Century*.
